Indexes to Volume 4

Authors and Titles

Adato, I., and McGlasson, W. B.
Effects of ethylene and propylene on post-harvest development and ripening of young normal and mutant tomato fruits 459
Adato, I. *See also* McGlasson, W. B.
Anderson, R. L., Clarke, A. E., Jermyn, M. A., Knox, R. B., and Stone, B. A.
A carbohydrate-binding arabinogalactan–protein from liquid suspension cultures of endosperm from *Lolium multiflorum* 143
Corrigendum 319
Anderson, W. P., Robertson, R. N., and Wright, Barbara J.
Membrane potentials in carrot root cells 241
Asher, C. J., and Ozanne, P. G.
Individual plant variability in susceptibility to potassium deficiency: some observations on capeweed [*Arctotheca calendula* (L.) Levyns] 499

Bagga, A. K., and Rawson, H. M.
Contesting responses of morphologically similar wheat cultivars to temperatures appropriate to warm temperate climates with hot summers: a study in controlled environment 877
Bagga, A. K. *See also* Rawson, H. M.
Beardsell, Michael F.
Effects of routine handling on maize growth 857
Bernier, G. *See* Bodson, M.
Bieleski, R. L.
Accumulation of sorbitol and glucose by leaf slices of Rosaceae 11
Bieleski, R. L., and Redgwell, R. J.
Synthesis of sorbitol in apricot leaves 1
Bishop, D. G. *See* Pearson, Craig J.
Black, Clanton C. Jr., Burris, John E., and Everson, R. G.
Corrigendum to: Influence of oxygen concentration on photosynthesis in marine plants [Vol. 3, No. 1] 465
Blake, T. J. *See* Moore, G. M.
Bodson, M., King, R. W., Evans, L. T., and Bernier, G.
The role of photosynthesis in flowering of the long-day plant *Sinapis alba* 467
Brady, C. J., and Steele Scott, N.
Chloroplast polyribosomes and synthesis of fraction 1 protein in the developing wheat leaf 327
Brady, C. J. *See also* Hall, A. J.; Wrench Pamela; Wright, Lesley
Bremner, P. M. *See* Rawson, H. M.
Brown, J. M. A. *See* Browse, J. A.
Browse, J. A., Dromgoole, F. I., and Brown, J. M. A.
Photosynthesis in the aquatic macrophyte *Egeria densa*. I. $^{14}CO_2$ fixation at natural CO_2 concentrations 169
Bunce, J. *See* Warrington, I. J.

Chalmers, D. J., and Faragher, J. D.
Regulation of anthocyanin synthesis in apple skin
I. Comparison of the effects of cycloheximide, ultraviolet light, wounding and maturity 111
II. Involvement of ethylene 123
Chalmers, D. J. *See also* Faragher, J. D.
Chow, W. S., and Hope, A. B.
Proton translocation, electron transport and photophosphorylation in isolated chloroplasts 647
Chu, A. C. P., and McPherson, H. G.
Sensitivity to desiccation of leaf extension in prairie grass 381
Corrigendum 928
Clarke, A. E. *See* Anderson, R. L.
Clarke, the late A. R. P. *See* Sands, R.
Collier, Megan D., and Murray, David R.
Leucyl β-naphthylamidase activities in developing seeds and seedlings of *Pisum sativum* L. 571
Collier, Megan D. *See also* Murray, David R.
Connor, D. J., Legge, N. J., and Turner, N. C.
Water relations of mountain ash (*Eucalyptus regnans* F. Muell.) forests 753
Cook, M. G. *See* Sofield, I.
Coombe, B. G. *See* Zigas, R. P.
Coster, H. G. L., and Smith, J. R.
Low-frequency impedance of *Chara corallina*: simultaneous measurements of the separate plasmalemma and tonoplast capacitance and conductance 667

Daft, M. J. *See* Smith, S. E.
Dalton, P. J. *See* Reid, J. B.
Das, V. S. R. *See* Raghavendra, A. S.
Derrick, Geoffrey A. *See* Pearson, Craig J.

Digby, J. *See* Firn, R. D.
Downton, W. J. S.
Photosynthesis in salt-stressed grapevines 183
Dromgoole, F. I. *See* Browse, J. A.

Edge, E. A. *See* Forde, B. J.
Elliott, Daphne C.
Induction by EDTA of anthocyanin synthesis in *Spirodela oligorrhiza* 39
Esashi, Yohji, and Ohharra, Yuuko
Enhancement by low temperatures of the anaerobic induction of cocklebur seed germination 849
Evans, L. T. *See* Bodson, M.; King, R. W.; Sofield, I.

Faragher, J. D., and Chalmers, D. J.
Regulation of anthocyanin synthesis in apple skin. III. Involvement of phenylalanine ammonia-lyase 133
Faragher, J. D. *See also* Chalmers, D. J.
Ferrar, Pamela J. *See* Slatyer, R. O.
Fido, R. J., Gundry, C. S., Hewitt, E. J., and Notton, B. A.
Ultrastructural features of molybdenum deficiency and whiptail of cauliflower leaves: effects of nitrogen source and tungsten substitution for molybdenum 675

Firn, R. D., and Digby, J.
The role of the peripheral cell layers in the geotropic curvature of sunflower hypocotyls: a new model of shoot geotropism 337
Firn, R. D. *See also* King, R. W.
Forde, B. J., Mitchell, K. J., and Edge, E. A.
Effect of temperature, vapour-pressure deficit and irradiance on transpiration rates of maize, paspalum, westerwolds and perennial ryegrasses, peas, white clover and lucerne 889
Foster, R. C., and Sands, R.
Response of radiata pine to salt stress. II. Localization of chloride 863
Fox, A. L. *See* Smith, F. A.
Fukai, S., and Silsbury, J. H.
Effects of irradiance and solar radiation on dry matter growth and net CO_2 exchange of *Trifolium subterraneum* L. swards at a constant temperature 485
Responses of subterranean clover communities to temperature.
II. Effects of temperature on dark repiration rate 159
III. Effects of temperature on canopy photosynthesis 273
Fulcher, R. G., Setterfield, G., McCully, M. E., and Wood, P. J.
Observations on the aleurone layer. II. Fluorescence microscopy of the aleurone–sub-aleurone junction with emphasis on possible β-1,3-glucan deposits in barley 917

Gale, J. *See* Kaplan, A.
Geissler, Arthur E. *See* Harris, Roger L. N.; Katekar, Gerard F.
Gifford, Roger
Growth pattern, carbon dioxide exchange and dry weight distribution in wheat growing under differing photosynthetic environments 99
Glass, Anthony D. M.
Regulation of K^+ influx in barley roots: evidence for direct control by internal K^+ 313
Gleeson, P. A., and Jermyn, M. A.
Leguminous seed glycoproteins that interact with concanavalin A 25
Gulline, H. F. *See* Scott, B. I. H.
Gundry, C. S. *See* Fido, R. J.
Graham, D. *See* Reed, M. L.

Hall, A. J.
Assimilate source–sink relationships in *Capsicum annuum* L. I. The dynamics of growth in fruiting and deflorated plants 623
Hall, A. J., and Brady, C. J.
Assimilate source–sink relationships in *Capsicum annuum* L.
II. Effects of fruiting and defloration on the photosynthetic capacity and senescence of the leaves 771
Harris, Roger L. N., and Geissler, Arthur E.
Plant growth regulating activity of 3-indolylthioalkanoic acids 235
Haslemore, R. M. *See* Warrington, I. J.
Hatch, M. D., and Mau, Shaio-lim
Properties of phospho*enol*pyruvate carboxykinase operative in C_4 pathway photosynthesis 207
Hattersley, P. W., Watson, L., and Osmond, C. B.
In situ immunofluorescent labelling of ribulose-1,5-bisphosphate carboxylase in leaves of C_3 and C_4 plants 523
Hellmers, H. *See* Warrington, I. J.
Henningsen, Knud W. *See* Smillie, Robert M.

Hewitt, E. J. *See* Fido, R. J.
Hinde, R. W. *See* Wrench, Pamela; Wright, Lesley
Hope, A. B. *See* Chow, W. S.
Hough, R. Anton
Corrigendum to: Light and dark respiration and release of organic carbon in marine macrophytes of the Great Barrier Reef region [Vol. 3, No. 1] 465

Jacobsen, J. V. *See* Pressman, E.
Jenner, C. F., and Rathjen, A. J.
Supply of sucrose and its metabolism in developing grains of wheat 691
Jermyn, M. A. *See* Anderson, R. L.; Gleeson, P. A.

Kaplan, A., Gale, J., and Poljakoff-Mayber, A.
Effect of oxygen and carbon dioxide concentration on gross dark CO_2 fixation and dark respiration in *Bryophyllum daigremontianum* 745
Katekar, Gerard F., and Geissler, Art E.
Auxin transport inhibitors. II. 2-(1-Pyrenoyl)benzoic acid, a potent inhibitor of polar auxin transport 321
King, R. W., and Evans, L. T.
Inhibition of flowering in *Lolium temulentum* L. by water stress: a role for abscisic acid 225
King, R. W., Evans, L. T., and Firn, R. D.
Abscisic acid and xanthoxin contents in the long-day plant *Lolium temulentum* L. in relation to daylength 217
King, R. W. *See also* Bodson, M.
Knox, R. B. *See* Anderson, R. L.

Larkum, Anthony W. D. *See* Stewart, Alison
Legge, N. J. *See* Connor, D. J.
Ludlow, M. M., and Ng, T. T.
Leaf elongation rate in *Panicum maximum* var. *trichoglume* following removal of water stress 263
Lurie, Susan
Stomatal development in etiolated *Vicia faba*: relationship between structure and function 61
Stomatal opening and photosynthesis in greening leaves of *Vicia faba* L. 69

Marinos, N. G. *See* Williams, Acram M.
Mau, Shaio-lim. *See* Hatch, M. D.
McCully, M. E. *See* Fulcher, R. G.
McGlasson, W. B., and Adato, I.
Relationship between the capacity to ripen and ontogeny in tomato fruits 451
McGlasson, W. B. *See also* Adato, I.

Proline accumulation in tubers of Jerusalem artichoke 51
Wright, Lesley. *See also* Wrench, Pamela

Zee, S. Y. *See* Sofield, I.
Zigas, R. P., and Coombe, B. G.
Seedling development in peach, *Prunus persica* (L.) Batsch.
I. Effects of testas and temperature 349
II. Effects of plant growth regulators and their possible role 359

Subject Index

Abscisic acid:
  Content in *Lolium temulentum* in relation to daylength 217
  Role in inhibition of flowering in *Lolium temulentum* by water stress 225
Aleurone layer, observations on the. II 917
Amaranthus paniculatus, light-enhanced dark $^{14}CO_2$ fixation by leaves of 833
Anthocyanin:
  Regulation of synthesis of, in apple skin. I, II, III 111, 123, 133
  Synthesis in *Spirodela oligorrhiza*, induction by EDTA 39
Apium graveolens, varietal differences in light requirements for germination of seeds of 821
Apple, regulation of anthocyanin synthesis in skin of. I, II, III 111, 123, 133
Apricot, synthesis of sorbitol in leaves of 1
Arabinogalactan–protein, carbohydrate-binding, from liquid suspension cultures of endosperm from *Lolium multiflorum* 143
Arctotheca calendula, individual plant variability in susceptibility to potassium deficiency 499
Artichoke, Jerusalem:
  Proline accumulation in tubers of 51
  Source of carbon for proline synthesis in osmotically stressed tuber slices 703
Auxin transport inhibitors: II 321

Barley:
  Aspects of adaptation to soil moisture deficits 389
  Development of photochemical activity in chloroplast membranes of. I, II 415, 439
  Possible occurrence of β-1,3-glucan deposits in 917
  Regulation of K^+ influx in roots of 313
Brassica oleracea:
  Net carbon exchange rate of, in relation to irradiance and dry weight accumulation 555
  Ultrastructural features of molybdenum deficiency and whiptail of leaves of 675
Broad bean, see *Vicia faba*
Bryophyllum daigremontianum, effect of oxygen and carbon dioxide concentrations on gross dark CO_2 fixation and dark respiration in 745

Cabbage and lettuce plants in dilute solution culture, growth and phosphate absorption in 505
Capeweed, see *Arctotheca calendula*
Capsicum annuum, assimilate source–sink relationships in. I, II 623, 771
Carbonate dehydratase, activities of photosynthetic enzymes and, in *Chlorella* after growth or adaptation in different carbon dioxide concentrations 87
Carbonic anhydrase, see carbonate dehydratase
Carrot, membrane potentials in root cells of 241
Cauliflower, see *Brassica oleracea*
Celery, see *Apium graveolens*
Chara corallina, low-frequency impedence of 667
Chlorella, activities of photosynthetic enzymes and carbonate dehydratase (carbonic anhydrase) in, after growth or adaptation in different carbon dioxide concentrations 87
Chloride:
  Localization in radiata pine 863
  Uptake in *Citrus* leaf slices 177
Chloroplasts:
  Development of photochemical activity in membranes of. I, II 415, 439
  Isolated, proton translocation, electron transport and photophosphorylation in 647
Citrus leaf slices, interactions between chloride and nitrate uptake in 177
Clover:
  Subterranean, see *Trifolium subterraneum*
  White, see *Trifolium repens*
Cocklebur, see *Xanthium pensylvanicum*
Concanavalin A, leguminous seed glycoproteins that interact with 25
Cotton, contribution of the root system to nitrate assimilation in whole plants of 811
Cucumber, see *Cucumis sativus*
Cucumis melo, net carbon exchange rate of, in relation to irradiance and dry weight accumulation 555
Cucumis sativus, net carbon exchange rate of, in relation to irradiance and dry weight accumulation 555

Dibromothymoquinone, effect of, on electron transport reactions in chloroplast preparations 253

EDTA, induction of anthocyanin synthesis in *Spirodela oligorrhiza* by 39
Egeria densa, photosynthesis in 169

Electron transport, proton translocation and photophosphorylation in isolated chloroplasts 647
Ethylene:
Effects of, on post-harvest development and ripening of young normal and mutant tomato fruits 459
Involvement of in regulation of anthocyanin synthesis in apple 123
Eucalyptus obliqua, effects of heat on the physiology of seedlings of 283
Eucalyptus pauciflora, altitudinal variation in the photosynthetic characteristics of II, III, IV, V, VI 289, 301, 583, 595, 901
Eucalyptus regnans forests, water relations of 753

Fraction 1 protein, synthesis of, and chloroplast polyribosomes in the developing wheat leaf 327

Geotropic curvature of sunflower hypocotyls, role of the peripheral cell layers in 337
Gibberellic acid, influence of, on flowering in *Pisum* 479
β-1,3-Glucan deposits in the barley aleurone layer 917
Glucose, accumulation of, by leaf slices of Rosaceae 11
Glycoproteins that interact with concanavalin A, from leguminous seeds 25
Grapevines, salt-stressed, photosynthesis in 183

Immunofluorescent labelling, *in situ*, of ribulose-1,5-bisphosphate carboxylase in leaves of C_3 and C_4 plants 523
3-Indolylthioalkanoic acids, plant growth regulating activity of 235

Legumes, glycoproteins from seeds of, that interact with concanavalin A 25
Lettuce and cabbage plants in dilute solution culture, growth and phosphate absorption in 505
Leucyl β-naphthylamidase activities in developing seeds and seedlings of *Pisum sativum* L. 571
Lolium multiflorum, a carbohydrate-binding arabinogalactan–protein from liquid suspension cultures of endosperm from 143
Lolium temulentum
Abscisic acid and xanthoxin contents in, in relation to daylength 217
Inhibition of flowering in by water stress 225
Lucerne, effect of temperature, vapour-pressure deficit and irradiance on transpiration rates of 889
Medicago sativa, mycorrhizal and non-mycorrhizal, interactions between growth, phosphate content and nitrogen fixation in 403
Mountain ash, see *Eucalyptus regnans*

Nitrate and chloride uptake in *Citrus* leaf slices, interactions between 177
Nitrogen:
Content during grain development and maturation in wheat 799
Fixation, in mycorrhizal and non-mycorrhizal *Medicago sativa* 403

Panicum maximum var. *trichoglume*
Leaf elongation rate in, following removal of water stress 263
Variation of leaf characteristics with level of insertion on a tiller 733
Paspalum, effect of temperature, vapour-pressure deficit and irradiance on transpiration rates of 889
Peach, see *Prunus persica*
Pennisetum
Leaf structure and composition 541
Thermal adaptation of 763
Phenylalanine ammonia-lyase, involvement of in regulation of anthocyanin synthesis in apple skin 133
Phosphatase, acid, in developing seeds of *Pisum sativum* 843
Phosphate:
Absorption in lettuce and cabbage plants in dilute solution culture 505
Content in mycorrhizal and non-mycorrhizal *Medicago sativa* 403
Phospho*enol*pyruvate carboxykinase operative in C_4 pathway, properties of 207
Phosphorus, nitrogen and water contents during grain development and maturation in wheat 799
Photochemical activity, development of, in chloroplast membranes of barley I, II 415, 439

Photophosphorylation, proton translocation and electron transport in isolated chloroplasts 647
Photosynthesis:
C_4 pathway, properties of phospho*enol*-pyruvate carboxykinase operative in 207
In *Egeria densa*. I 169
In greening leaves of *Vicia faba* 69
In salt-stressed grapevines 183
Of developing soybean pods 713
Regulation of, in *Chlorella* 87
Role of, in flowering of *Sinapis alba* 467
Pine, radiata, response of, to salt stress I, II 637, 863
Pisum sativum:
Acid phosphatase activities in developing seeds of 843
Effect of temperature, vapour-pressure deficit and irradiance on transpiration rates of 889
Flowering in 479
Isolated chloroplasts of, proton translocation, electron transport and photophosphorylation in 647
Leucyl β-naphthylamidase activities in developing seeds and seedlings of 571
Regulation of movement of assimilates into ovules of 515
Polyribosomes, chloroplast, and synthesis of fraction 1 protein in the developing wheat leaf 327
Potassium deficiency, individual plant variability of capeweed in susceptibility to 499
Prairie grass, sensitivity to desiccation of leaf extension in 381
Proline:
Accumulation in tubers of Jerusalem artichoke 51
Synthesis in osmotically stressed artichoke tuber slices 703
Propylene, effects of, on post-harvest development and ripening of young normal and mutant tomato fruits 459
Proton translocation, electron transport and photophosphorylation in isolated chloroplasts 647
Prunus persica
Analysis of the effects of virus infection on the photosynthetic properties of leaves of 723
Seedling development in. I, II 349, 359
2-(1-Pyrenoyl)benzoic acid, a potent inhibitor of polar auxin transport 321
Respiration and photosynthesis of developing soybean pods 713
Ribulose-1,5-bisphosphate carboxylase in leaves of C_3 and C_4 plants, *in situ* immunofluorescent labelling of 523
Rockmelon, see *Cucumis melo*
Rosaceae, accumulation of sorbitol and glucose by leaf slices of 11
Rumex vesicarius, light-enhanced dark $^{14}CO_2$ fixation by leaves of 833
Ryegrasses, effect of temperature, vapour-pressure deficit and irradiance on transpiration rates of 889

Setaria italica, light-enhanced dark $^{14}CO_2$ fixation by leaves of 833
Sinapis alba, the role of photosynthesis in flowering of 467
Snow gum, see *Eucalyptus pauciflora*
Sorbitol:
Accumulation of, by leaf slices of Rosaceae 11
Synthesis of, in apricot leaves 1
Soybean
Growth and physiological responses under various thermoperiods 371
Photosynthesis and respiration of developing pods of 713
Spinacea oleracea, isolated chloroplasts of, proton translocation, electron transport and photophosphorylation in 647
Spirodela oligorrhiza, induction by EDTA of anthocyanin synthesis in 39
Stomata:
Development of, in *Vicia faba* 61
Diffusive conductance of, in wheat 75
Metabolism of 611
Opening of, in *Vicia faba* 69
Subterranean clover, see *Trifolium subterraneum*
Sucrose supply and metabolism in developing grains of wheat 691
Sunflower, role of the peripheral cell layers in geotropic curvature of hypocotyls of 337
Sweet corn, see *Zea mays*

Thermoperiodicity in soybeans 371
Tomato:
Effects of ethylene and propylene on post-harvest development and ripening of young normal and mutant fruits of 459
Relationship between capacity to ripen and ontogeny in fruits of 451

Trifolium repens
Circadian electrochemical changes in the pulvinules of 193
Effect of temperature, vapour-pressure deficit and irradiance on transpiration rates of 889
Trifolium subterraneum
Responses of communities to temperature. II, III 159, 273
Effects of irradiance and solar radiation on dry matter growth and net CO_2 exchange in swards of 485

Vicia faba:
Etiolated, stomatal development in 61
Net carbon exchange rate of, in relation to irradiance and dry weight accumulation 555
Stomatal opening and photosynthesis in greening leaves of 69

Water potential and diffusive conductance of wheat plants before and after anthesis, changes in 75
Water relations of *Eucalyptus regnans* forests 753
Water stress:
Inhibition of flowering in *Lolium temulentum* by 225
Leaf elongation rate in *Panicum maximum* var. *trichoglume* following removal of 263
Wheat:
Aspects of adaptation to soil moisture deficits 389
Changes in diffusive conductance and water potential of plants before and after anthesis 75
Contents of nitrogen, phosphorus and water during grain development and maturation in 799
Chloroplast polyribosomes and synthesis of fraction 1 protein in developing leaf of 327
Factors influencing the rate and duration of grain filling in 785
Growth pattern, carbon dioxide exchange and dry weight distribution in 99
Responses to temperature of morphologically similar cultivars of 877
Supply of sucrose and its metabolism in developing grains of 691

Xanthium pensylvanicum, enhancement by low temperatures of the anaerobic induction of seed germination in 849
Xanthoxin and abscisic acid contents in the long-day plant *Lolium temulentum* L. in relation to daylength 217

Zea mays:
Effect of temperature, vapour-pressure deficit and irradiance on transpiration rates of 889
Effects of routine handling on growth of 857
Net carbon exchange rate of, in relation to irradiance and dry weight accumulation 555

Printed by CSIRO, Melbourne
